Common Law Contracts

Common Law Contracts - Raymond T. Nimmer (LEONARD CHILDS PROFESSOR OF LAW, *University of Houston Law Center*, Houston, Texas, CO-DIRECTOR, *Intellectual Property and Information Law Program*, University of Houston Law Center, –DISTINGUISHED CHAIR IN RESIDENCE, *Universidade Católica*, Lisbon Portugal, HONORABLE CHAIR PROFESSOR, IP Graduate Institute of National Taipei University of Technology, Taiwan, 2012 -

Description

The course covers the main features of common law contracts. After a glimpse back in centuries, useful to understand the origin of the great divide between the continental and the Anglo-Saxon approach to the subject, and an overview over general definitions and applicable laws, we will first analyze the distinction between enforceable and unenforceable promises. Next, we will study the process of contract formation (agreement and consideration) and the reasons that may make the contract invalid (legal incapacity, duress and undue influence, mistake, misrepresentation, unconscionability, violation of Statute of Fraud). Moving from the physiology to the pathology of contractual relationships, we will focus on the justifications for non-performance (impossibility, impracticability, frustration, force majeure, modification, rescission, anticipatory breach) and the cases of breach of contract. Finally, we will analyze the choice of remedies and the peculiar construction of quasi-contracts.

This course provides a summary of modern American contract law. The emphasis is on how common law contract principles have been, and are constantly being, developed and refined by common law courts. The Restatement of Contracts and the Uniform Commercial Code will be discussed as part of the over-all survey of modern American contract law. An overview of such basic concepts as offer, acceptance, consideration, defenses to contract formation, and remedies will be presented as will practice based solutions to particular problems. The course assumes some familiarity with U.S. civil procedure (federal and state). It is designed to give lawyers familiar with Code contract principles an idea of how the American common law has shaped and developed similar commercial concepts and principles. The emphasis is on practice and theory and is geared to the practitioner and student.

Although civil law and common law are different legal systems, with different origins, history, methodology and rules, today's global market demands a global or transnational approach to contract law -- a core set of rules and principles to facilitate transactions and business. That core set of principles exists, which explains why common law and civil law oftentimes arrive at similar solutions to legal problems. The purpose of this course is to provide lawyers educated in the civil law tradition with an introduction to modern American contract law in order to assist them in arriving at that core set of principles through an understanding of both legal systems. Students will analyze and discuss certain basic core principles of the common law, and the fundamental elements

of American contract law: mutual assent, enforceability, performance and breach, remedies, and defenses. Although these general principles will be discussed in a traditional, Socratic format, students are encouraged to engage in discussion about the similarities and differences between the common law of contract and the different statutory frameworks that control in their respective civil law jurisdictions. The class will discuss, among others, similarities and differences between the civil code and the Restatement and UCC, code-defined formalities and the statute of frauds, and compare common law and equitable remedies to those available under the civil codes. The course will emphasize negotiating with lawyers from different legal traditions, as well as enforcement of contracts (created under both common law and civil law) by the courts of both legal systems. The purpose of engaging in comparative analyses is for students' questions and specific interests to be addressed by reference to concepts with which they are already familiar, transcending the realm of the theoretical. The course will focus on the practical points of contact and conflict between the different legal systems and their interactions.

Each topic will be linked with the correspondent civil law institution, in order to provide students with a structured comparative knowledge of the subject.

Assessment system within the class

- * 30 points is envisaged for attendance
- * 15 points for written exam and 15 points for active participation within the class
- * 40 points for performance on an essay exam that allow students to use class PowerPoints and their notes.

RAYMOND T. NIMMER

2001 Holcombe Blvd., # 1302, Houston, Texas 77030
